European Book on Vascular Medicine/Angiology

UEMS-EBEA VM Reference Book for European Training and CESMA-UEMS European Exam

Pre-Booking
www.vas-int.net
This book meets these needs and is the reference of both educational training and for European Certification/Accreditation. This book is therefore intended for, students to study the essence of this subject, those specialists or MD who want to be constantly updated, those who want to undergo the CESMA-UEMS European Exam to obtain the European Diploma in Angiology/Vascular Medicine, those who follow the European Master or the European Advanced Postgraduate Courses and those who want to take an active part in European training, those that tend to find their own qualified and progressive road, at European level respectful of the highest quality and also of the cultural patrimony of each country.

The book is the result of extraordinary collaboration involving more than 130 highly qualified European Authors.

It’s a dynamic Book, both in its presentation and essence. Other contributions will follow and suggestions and proposals on the part of those who read the book will be taken into serious consideration. Due to the need to update existing material and to quickly include changing data, the book will be revised and improved continuously.

The book will also be available as an E-book (on the VAS website). On VAS' homepage E-book area, you will find the most recent information for every single chapter with links to the relevant documents which will lead to deeper understanding of that area of Angiology.

The book will be available in the late Spring 2017. Pre-booking is welcome

All the Authors and the Editorial Committee offered their collaboration and any income will be in favour of VAS.
Table of Contents

1. GENERAL
   1.1. Pathophysiology
       Arterial Hemodynamics
       Venous Hemodynamics
       Microcirculation
       Physiology and Pathophysiology of Lymphatic System
       Haemorheological Aspects of Peripheral Vascular Diseases
       Endothelium in Vascular Diseases
       Atherosclerosis pathogenesis
       Pathophysiology of Arterial and Venous Thrombosis
       Arterial Stiffness
   1.2. Diagnostics
       Continuous wave Doppler ultrasound
       Duplex Ultrasound for the Diagnosis of Vascular Diseases
       Other Complementary Techniques
       Angiography, CT- and MR Angiograph
       Diagnostics in Microcirculation: Capillaroscopy
       Transcutaneous P02 Measurement
       Markers of Preclinical Atherosclerosis and their Clinical Relevance
   1.3. Clinical Evaluation
       Medical History in Vascular Diseases
       The Physical Examination
       Comorbidity, Multimorbidity, and the Challenge of Equity

2. ARTERIAL DISEASE
   2.1. Arterial Disease
       Multi-disease Patients
       Risk Factors for Arterial Diseases

Emil Monos (H)
Angelika Chachaj (PL), Andrzej Szuba (PL)
Michelini Sandro (I), Cestari Marina (I)
Katalin Biró, Dávid Kovács, Katalin Koltai, Kálmán Toth, Gábor Kesmárky (H)
Elisabetta Dejana (I)
Christian Weber (D)
Marc Righini (CH), Robert Ebad Helia (CH)
EWG
Katalin Farkas (H)
Beatrice Amann-Vesti (CH), Christoph Thalhammer (CH)
Muriel Sprynger (B)
Jos C. Van Den Berg (CH)
Bengt Fagrell (S)
Romeo Martini (I), Pierre Abraham (FR)
Pavel Poredos (SLO)
Dan Mircea Olinc (RO), Maria Olinc (RO)
Alessandra Bura-Riviere (F)
Stewart Mercer (UK), Jenna-Marie Lundy (UK)
Dan Mircea Olinc (R)
Jan Pina (CZ), Karel Roztocil (CZ)
Atherosclerosis
How to Evaluate and Reduce Micro- and/or Macrovascular Residual Risk?

2.2. Peripheral Arterial Disease
Smoking - WHO Projects
Incidence and Prevalence of Peripheral Artery Disease
Peripheral Artery Disease: An Epidemiological Perspective
PAD - Stage I and II
Critical Limb Ischaemia
Acute Critical Leg Ischaemia
Multi-site Artery Disease
Primary care of PAD
PAD Rehabilitation

2.3. Cerebro-Vascular Disease
Epidemiology of Cerebro-Vascular Disease
Stroke, Transient Ischemic Attack, and Minor Stroke
Secondary Prevention after Ischemic Stroke and TIA
Indications for Carotid Endarterectomy
Subclavian Steal Syndrome

2.4. Aortic And Visceral Arterial Disease
Abdominal Aortic and Iliac Aneurismal Disease
Aortic Dissection
Mesenteric Vascular Disease
Renal Vascular Disease
Vascular Access for Hemodialysis

2.5. Diabetes And Arterial Disease
Epidemiology of Diabetes
Diabetic Angiopathy
Diabetic Foot

3. MICROCIRCULATION
